

**Preliminary Draft List of Delta Species Currently Proposed
to be Included in the Conservation Strategy**

April 30, 1998

Preliminary Criteria for Inclusion on this List

This is a list of special-status species in the Delta Region. The list was developed using the criteria described below. Species shaded in gray are those special-status species that do not meet the preliminary criteria for inclusion and would likely not be addressed in the Conservation Strategy.

Special-Status Species

Special-status species are any species with some form of endangerment or concern status. Special-status species are species that are:

- federally listed as threatened or endangered under the Endangered Species Act (ESA),
- California listed as threatened or endangered under the California Endangered Species Act (CESA),
- proposed for federal listing under the ESA,
- California candidates under the CESA,
- federal candidates under the ESA,
- California fully protected species or specified birds,
- California species of special concern (CSC),
- California Native Plant Society (CNPS) List 1A, List 1B, List 2, List 3, or List 4, or
- other species of concern to CALFED.

The list includes all special-status species known to occur or with the potential to occur in the Delta Region (i.e., the legal Delta). The determination that a species has the potential to occur was based on the species' known range and the presence of suitable habitat in the Delta Region.

Species Addressed by the Conservation Strategy

Criteria for selection of species to potentially be covered in the Conservation Strategy are:

- the species is federally or California listed as rare, threatened, or endangered, or
- the species is a California fully protected species, or
- the species could become federally or California listed as threatened or endangered during the term of CALFED implementation, and
- the species could be affected by CALFED actions.

Species considered to have the potential to become federally or California listed as threatened or endangered during the term of CALFED implementation are those species that are:

- proposed for federal listing
- California candidates
- federal candidates
- California species of special concern (each species considered individually for inclusion - see decision criteria)
- specified birds (each species considered individually for inclusion - see decision criteria)
- CNPS List 1 and List 2 (each species considered individually for inclusion - see decision criteria)
- Other species of concern (each species considered individually for inclusion - see decision criteria).

Decision Criteria for CSC, Specified Birds, CNPS List 1-4, and Other Species of Concern

- ^a Included because CALFED actions could affect a substantial portion of the species range or important habitat.
- ^b Included because of the limited distribution or rarity of the species.

Notes:

Type: A = Amphibian, B = Bird, F = Fish, I = Invertebrate, M = Mammal, P = Plant, R = Reptile

 Species not likely to be addressed in the Conservation Strategy

Federal Status:

- E = Listed as endangered under federal ESA
- T = Listed as threatened under federal ESA
- PE = Proposed for listing as endangered under ESA
- PT = Proposed for listing as threatened under ESA
- C = Candidate for listing under ESA

State Status:

- CE = Listed as endangered under CESA
- CT = Listed as threatened under CESA
- CCE = Candidate for listing as endangered under CESA
- CCT = Candidate for listing as threatened under CESA
- R = Listed as rare under California Native Plant Protection Act
- CSC = California species of special concern
- FP = Fully protected under California Fish and Game Code
- SB = Specified birds under California Fish and Game Code

Other Status:

- 1A = California Native Plant Society List 1A
- 1B = California Native Plant Society List 1B
- 2 = California Native Plant Society List 2
- 3 = California Native Plant Society List 3
- 4 = California Native Plant Society List 4
- SC = other species of concern identified by CALFED

Not Likely to be Affected:

- X1 = CALFED actions do not affect the species because habitat is not limiting and the species is mobile
- X2 = Species occurs in areas that would not be affected by CALFED actions

Not Enough Information on the Species:

- X = Not enough information on the species' biology or distribution to make a determination on effects

May be Affected:

- X = CALFED actions may result in take of federal or California protected species, species are associated with habitat types or occur at specific locations that may be adversely or beneficially affected by CALFED depending on where CALFED actions would be implemented, or species that are rare or transient in the Delta Region and may be affected by CALFED depending on when or where CALFED actions would be implemented.

R = Species for which recovery is a CALFED objective.

Potential Effects outside the Delta Region:

Species that are likely to be affected or that may be affected by CALFED actions implemented in other CALFED solution area regions. Solution area region codes are:

- SC = Sacramento River Region
- SJ = San Joaquin River Region
- B = Bay Region
- None = No effects outside of Delta region
